

# VULNERABILITY ASSESSMENT & PENETRATION TESTING

The vulnerability assessment and penetration testing performed by NetCenergy safely simulates the experience of having a hacker invade your network. Why do that? It's a comprehensive analysis of your company's IT network; we look for where sensitive data and applications could reside within your organization. We don't just look for vulnerabilities; we exploit them to show you how detrimental a potential hack could be for your company.

✓ **Proactive Testing**

✓ **Detailed Reports**

✓ **Reliable Results**

## What We Identify

- Ransomware •
- Malware •
- Phishing •
- Denial of Service •

## What You Get

We provide you with a comprehensive report detailing your vulnerabilities. It's clear and concise, and will identify ways you can protect your most valuable data.

## Serving All Industries

No matter your industry — or size — all company data and stored information should be protected from cyber attackers.

## Why Have Testing Done?

It's a proactive way to simulate a realistic attack, revealing security flaws and issues beyond the scope of a general assessment. Exposing your risks lets you confront the issue before it becomes a costly problem.

## What Are Next Steps?

**NetCenergy** can undertake a follow-up test to ensure you remediate any identified issues and schedule a regular test to satisfy your insurance mandates and other industry specific compliance requirements..

## Why Choose Us?

**We test using a sophisticated process and industry "best practices"**

**We provide clear and comprehensive reports detailing your vulnerabilities**

**We've been providing IT security since 2003**
